PROFESSIONAL SUMMARY

Results-driven AI Solution Builder and B.Tech graduate in AI & Data Science with hands-on experience designing end-to-end Generative AI, Conversational AI, and workflow automation systems. Proven track record of developing AI Voice Bots, WhatsApp Bots, RAG pipelines, and AI agents integrating LLMs, STT/TTS, n8n, and Twilio for enterprise operational efficiency. Skilled across the full AI development lifecycle—from Deep Learning and NLP to backend API integration, intelligent document processing, and AI automation.

SKILLS

- AI Automation
- Generative AI & Large Language Models (LLMs)
- Retrieval-Augmented Generation (RAG)
- Conversational AI
- Deep Learning & Convolutional Neural Networks (CNNs)
- Machine Learning
- Django Full-Stack Web Development

EXPERIENCE

Muthoot Fincorp Limited

AI Solution Builder Intern

- Independently developed a Multilingual Voice AI Agent for Banking & Loan Notifications to automate daily pre-debit notifications and customer follow-ups using natural, human-like voice conversations and multilingual language switching. The system captures customer responses and specific reasons for payment refusal, classifies call outcomes, and automatically stores the conversation data in Google Sheets.
- Independently developed a WhatsApp Loan Verification & CRM Automation System to automate customer verification through structured conversational flows. Implemented interactive buttons, list menus, and free-text inputs to make responses easy for customers, while automatically capturing, validating, and updating customer information and verification status in Google Sheets.
- Designed and implemented end-to-end automation workflows connecting AI agents, WhatsApp/Voice communication, Webhooks, and Google Sheets, enabling automated customer engagement, response capture, data synchronization, and follow-up processes with minimal manual intervention.

AISECT Institute (TN Skill Corporation)

AI & Machine Learning Trainee

- Completed a comprehensive AI and Machine Learning course covering core ML algorithms, data preprocessing, model training, and evaluation.
- Gained hands-on experience in Python-based ML development, working with supervised and unsupervised learning techniques.
- Built and trained Deep Learning models using CNNs and gained exposure to multiple other Deep Learning architectures.
- Completed a fully working Song Genre Analysis project using CNN, including dataset preparation, model building, and performance evaluation.
- Developed a Pneumonia Diagnosis System using Convolutional Neural Networks and Deep Learning as part of the final-year academic project, covering model development, training, and evaluation.

FIIT Institute

Web Development Trainee

- Completed Full Stack Web Development course covering both frontend and backend development.
- Built responsive web apps using HTML, CSS, JavaScript, and Bootstrap.
- Developed backend using Python (Django), MySQL, and RESTful APIs.
- Deployed a fully working e-commerce site as part of Final project.

KEY PROJECTS

Multimodal Document Intelligence & Enterprise RAG System

- Built a Multimodal Document Intelligence and OCR pipeline using RAG for PDFs, Word documents, images, smartphone camera images, scanned files, and various document formats.
- Developed an Enterprise RAG system with Embeddings and Vector Search for fast, context-grounded document retrieval.
- Implemented AI Guardrails and Source Citations to minimize hallucinations and ensure policy answers remain grounded in verified documents.
- Built a Web-Based Interactive RAG Chatbot that retrieves answers from enterprise documents in real time, with one-click PDF download of the complete Q&A conversation directly from the same interface.

Core Technologies: Retrieval-Augmented Generation (RAG), Multimodal Vision & OCR, Semantic Vector Search & Embeddings,n8n, Unstructured Data Pipelines, Automated PDF Report Generation

Multilingual Voice AI Agent for Banking & Loan Pre-Notification

- Built an automated outbound Voice AI Agent for daily loan pre-debit notifications, including scheduled batch calling and personalized customer conversations using natural, human-like voice interactions.
- Developed a real-time multilingual conversational system supporting natural language switching across English, Tanglish, Hinglish, and regional dialects.
- Integrated customer and field-agent interaction history into live calls for personalized conversations and implemented Intent Classification for payment confirmation, refusal, callback requests, advance payment requests, and no-answer outcomes.
- Built an automated post-call workflow using Webhooks and AI to accurately capture and store customer responses and refusal reasons as stated during the conversation, along with call outcomes and transcripts, in Google Sheets while tracking attempts and scheduling follow-ups automatically.

Core Technologies: Conversational AI, Voice AI Agents, Multilingual STT/TTS, n8n, Prompt Engineering & Guardrails, Webhooks, Google Sheets Automation

WhatsApp Loan Verification & CRM Automation System

- Built an automated WhatsApp Loan Verification Bot using n8n and WhatsApp Business Cloud API to guide customers through a structured verification process.
- Designed user-friendly conversational flows with interactive buttons, list menus, and free-text inputs, making it easy for customers to confirm, select, or provide required information.
- Implemented real-time customer response capture and automatic storage in Google Sheets, including updating existing details without overwriting previous information.
- Built event-driven Webhook workflows to process incoming messages, manage conversation state, handle corrections and exceptions, and automatically update verification status and customer data in Google Sheets.

Core Technologies: n8n Workflow Automation, WhatsApp Business Cloud API, Webhooks, Conversational AI, Interactive WhatsApp Components, Google Sheets API, Multi-Turn Conversation Flows, JSON Data Processing

EDUCATION

Panimalar Institute of Technology, Chennai B.Tech in Artificial Intelligence and Data Science CGPA: 8.4	2021-2025
Oxford Matric Hr. Sec. School, Sivaganga - HSC Score: 82%	2019-2021
Oxford Matric Hr. Sec. School, Sivaganga - SSLC Score: 80%	2018-2019

CERTIFICATIONS

- AI & Machine Learning Certification — AISECT / TN Skill Corporation
- Full Stack Web Development — FIIT Institute
- AWS Cloud Practitioner Essentials — Amazon Web Services (AWS)
- Oracle Cloud Infrastructure Foundations Associate — Oracle
